Family Relations and Cohesion

Instrument: Student Survey of Risk and Protective Factors, CSAP Core Measure

Scale/Subscale Name: Family Relations and Cohesion

Developers: Social Development Research Group, University of Washington

Year: Unknown

Target Audience(s): Parents and adolescents

Language other than English available: Spanish

Type: Behavior

Data collected: Quantitative

Data collection format: Self report/Observational - Pre/post

Reading Level: Flesch-Kincaid Grade level: 6.4

Level of training necessary for administration/scoring/interpretation: None necessary. Paper and pencil scoring with the sum of ratings used as a total scale score.

Widespread Use/Professional Endorsements: This scale is considered a CSAP Core Measure and is endorsed by and made available for programmers and evaluators through SAMHSA.

Cost of Use: No costs associated with the use of this instrument.

Description:
- 6 item scale related to family interaction and cohesion.
Psychometrics:
Information on reliability and validity are provided below. If information on a particular psychometric was not found, it is indicated as “no information provided.” It should be noted that this is not necessarily an indication of a lack of reliability or validity within a particular scale/instrument, but rather a lack of rigorous testing, for various reasons, by the developers or other researchers.

Scale is currently undergoing psychometric studies.

Reliability: A correlation of at least .80 is suggested for at least one type of reliability as evidence; however, standards range from .5 to .9 depending on the intended use and context for the instrument.

- **Internal Consistency**: No information provided
- **Inter-rater reliability**: No information provided
- **Test-Retest**: No information provided

Validity: The extent to which a measure captures what it is intended to measure.

- **Content/Face Validity**: No information provided
- **Criterion Validity**: No information provided
- **Construct Validity**: No information provided
